Education

University of Oxford, Merton College, UK
MPhil in Economics

Sep 2026 – Jun 2028

University of Warwick, Coventry, UK
BSc Economics

2023 – 2026
2:1 (Hons)

Selected coursework: Microeconometrics, Data Science for Economists, Labour Economics, Economic Growth, International Trade, Research in Applied Economics

Research Experience

Housing Frictions, Agglomeration, and Growth *EC331 Research in Applied Economics*
↪ Supervisor: Dr. Arthur Galichère

Oct 2025 – Apr 2026
University of Warwick

- Embedded a DMP housing-search block in an endogenous-growth model, showing that housing frictions hold the urban share below its efficient level and impose a permanent growth loss
- Derived a local welfare diagnostic from the free-entry envelope, avoiding an implementable planner benchmark
- Calibrated to UK data in closed form; verified sign-robustness via impulse responses in MATLAB and Dynare
- Graded **74%**

Sibling Composition and Self-Perceived Academic Achievement *EC338 Microeconometrics*

Nov 2025 – Dec 2025

- Examined whether sibling gender composition affects self-perceived academic achievement using repeated cross-sectional HBSC data for adolescents in single-sibling households
- Estimated ordered probit specifications exploiting quasi-random sibling-sex assignment, with clustered standard errors, heterogeneity analysis, and minimum detectable effect calculations
- Ranked **1st/90**

Origin-Country Effects on Occupational Skill Placement *EC226 Econometrics*

Mar 2025 – May 2025

- Estimated origin-country effects on occupational skill placement using ordered probit and multinomial logit models on UK Census microdata (approximately 1,000,000 observations)
- Linked estimated marginal effects to origin-country characteristics in second-stage regressions and documented robust heterogeneity conditional on UK demographics and education
- Ranked in the **Top 5% of 422**

Health Outcomes in UK Survey Data *EC124 Statistical Techniques*

Mar 2024 – May 2024

- Analysed 4,358 UK health survey observations in **R**, estimating OLS and robust specifications with standard diagnostic tests for specification and heteroskedasticity
- Ranked **1st/559**

Experience

S&W Group - Restructuring and Recovery *Summer Analyst*

Jun 2025 – Aug 2025

- Analysed quantitative case data across 25 mid-market insolvency engagements with claims of up to £20M

Charles River Associates *Spring Intern*

Mar 2025 – Mar 2025

- Examined competition cases using industrial organisation frameworks to assess firm conduct and regulatory outcomes

Service

Economics Student Mentor *Department of Economics – University of Warwick*

Oct 2025 – Jun 2026

- Supported first-year economics students through regular meetings on academic transition and study planning

Student Fundraiser *Alumni Engagement & Development Office – University of Warwick*

Oct 2024 – Jun 2025

- Conducted fundraising outreach to university alumni, contributing to £15K in donations and ranking 1st/30 callers

Skills

Econometric Methods	Dynamic structural modelling and calibration; limited dependent variable models via maximum likelihood; IV, RD, DiD, panel methods; clustered and robust inference
Software	Python, Stata, R, MATLAB, Dynare, $\LaTeX$, Git
Languages	English (Native), Hindi (Fluent), French (Limited Professional Fluency)
