Education

University of Warwick, Coventry, UK
BSc. Economics

2023 – 2026

Year 1: 73.5% · Year 2: 65.5%; Predicted First

Research Experience

Undergraduate Dissertation *EC331 Research in Applied Economics*

In Progress

↔ Supervisor: Dr. Arthur Galichère

University of Warwick

- Developing a two-capital dynamic growth model with housing frictions, extending the Solow–Swan model to study how housing supply frictions generate spatial misallocation, TFP agglomeration, and convergence dynamics
- Characterising equilibrium numerically via fixed-point iteration and steady-state calibration; implementing simulation and sensitivity analysis in MATLAB/Dynare

Applied Microeconometrics Projects *EC338 Microeconometrics*

Nov 2025 – Dec 2025

- Ranked **1st/90** for analysing whether sibling gender composition affects self-perceived academic achievement, using repeated cross-sectional HBSC survey data (2006–2014) on adolescents in single-sibling households
- Exploited Angrist-Evans quasi-random assignment of sibling sex; estimated ordered probit models via maximum likelihood with clustered SEs, heterogeneity analysis, and minimum detectable effect (MDE) calculations

Applied Econometrics Project *EC226 Econometrics*

Mar 2025 – May 2025

- Ranked in the **Top 5% of 422** for estimating origin-country effects on occupational skill placement using ordered probit and multinomial logit models; linked marginal effects to origin-level fundamentals via second-stage regressions
- Exploited UK Census microdata (~1,000,000 observations) to document statistically robust heterogeneity in occupational sorting by country of origin, conditional on UK demographics and education

Statistical Techniques Project *EC124 Statistical Techniques*

Mar 2024 – May 2024

- Ranked **1st/559** for analysing 4,358 UK health survey observations in **R**, estimating OLS and robust models, and validating them with diagnostic tests for specification and heteroskedasticity

Mentorship & Extracurriculars

Economics Student Mentor *Department of Economics – University of Warwick*

Oct 2025 – Present

- Mentoring 10 year-one economics students through meetings advising on academics and extracurricular planning

Student Fundraiser *Alumni Engagement & Development Office – University of Warwick*

Oct 2024 – Present

- Ranked **1st/30** callers in fundraising outreach performance to university alumni, securing £15K in donations

Professional Experience

S&W Group - Restructuring and Recovery *Summer Analyst*

Jun 2025 – Aug 2025

- Analysed quantitative data across 25 mid-market insolvency cases (claims up to £20M) using financial models

Charles River Associates *Spring Intern*

Mar 2025 – Mar 2025

- Examined antitrust cases using industrial organisation models to assess firm behaviour and regulatory outcomes

RBC Capital Markets *Spring Intern*

Mar 2024 – Mar 2024

- Built financial models for a UK retail M&A simulation and participated in a macroeconomic trading simulation

Additional Information

Programming Languages & Tools
Languages

Python, Stata, R, MATLAB, Dynare, L^AT_EX & T_EX, Git Version Control
English (Native), French (Limited Professional Fluency)

Selected Modules

Year 1

Macroeconomics 1
Microeconomics 1
Statistical Techniques
Mathematical Techniques
Foundations of Finance
The World Economy: History & Theory

Year 2

Macroeconomics 2
Microeconomics 2
Econometrics 1
Mathematical Economics
Economic Growth

Year 3

Econometrics 2: Microeconometrics
Data Science for Economists
Labour Economics
International Trade
Applied Economics (3B)
Public Policy
Research in Applied Economics

Referees available on request.
